16 June 1975

MEMORANDUM FOR THE RECORD

SUBJECT: Discontinuance Former CATRAN Program

1. During the initial planning phase of the rewrite of the CATRAN program, it was decided to run both the old and the new CATRAN programs concurrently, January through June 1975 at which time the old program would be dropped. The rationale was that it would take approximately 6 months to debug the new program and build up a 6 month data base. The old program would continue through June to allow a 6 month consolidated run to be produced representing the second half FY-75.

2. The new program, as of late May, provides useable CATRAN data and reports. Records have been updated back to 1 January 1975 so any report produced now duplicates those reports being produced via the old system. As the old system requires a considerable number of man-hours in both OC and OJCS to perform the monthly update, an effort no longer necessary, the May and June updates will not be effected on the old system. Additionally, OC should forward a memorandum to OJCS stating that the old CATRAN program is defunct and OJCS support of this program may be discontinued.

Distribution:

Original - Forward to OC-O and return to OC-O/SOD

1 - OC-P&B

1 - OC-EXA
